To whom it may concern,

Advanced Disinfecting Services assisted Aspirata auditing, testing and certification (Pty) Ltd T/A Assurecloud to eliminate and maintain an area free of environmental contaminants in our laboratory building.

We would like to extend our heartfelt gratitude and appreciations to Mike van Niekerk and his team for assisting us with sharing their expertise and conducting training on proper cleaning techniques to prevent the spreading of natural environmental contaminants and maintaining a clean environment.

Their products have proven to be the solution to a very persistent problem which could not be eliminated by many other products which claimed to have similar performance.

We would highly recommend the services and products offered by **Advanced Disinfection Services**

Johan Jacobs

Laboratory Manager – Assurecloud Midrand Microbiology.
