

ECOHAND

LIQUID SANITISING HAND WASH

YOU CAN CLEAN WITHOUT DISINFECTING, BUT YOU CANNOT DISINFECT WITHOUT CLEANING.

ECOHAND containing Quadex® (V6) is an INTERMEDIATE LEVEL DISINFECTANT HAND WASH formulation, developed specifically for daily use in the industrial and household market, where sanitising of hands is necessary. It is a cost-effective hand hygiene method in environments where the spread of germs is a risk and where hands are not visibly soiled. ECOHAND is a commercial quality liquid hand wash gel, with slight foaming properties to allow maximum sanitising action close to the skin. ECOHAND has been specifically formulated with Biguanide and Amine derivatives, including wetting agents and surfactants, to give you the necessary microbial protection. ECOHAND washes away germs, cleanses, cares, and leaves the hands clean, soft and smooth. It contains no animal by-products, sodium chloride, sulfonates, sulphate acids or other harsh chemicals. Created especially for mass user sensitivity.

APPLICATION:

Can be used in all situations where the spread of germs is a risk. When nursing the sick or aged to help to prevent the spread of disease, after having been to the toilet, after playing with pets, after working with money. Before and after dressing wounds. After changing babies' nappies.
To use: Wet hands with warm water, then work a couple of pumps of mild hand wash into a lather allowing the soap to stay on the hands as long as possible (at least 20 seconds) before rinsing off thoroughly. This will remove harmful bacteria and leave your hands thoroughly clean and refreshed. Please remember to wash between your fingers as well where the fingers join the hand. This is one of the most critical points on hands where harmful bacteria occur.

Quadex® (V6) exhibits the latest features desired of a modern disinfectant.

- NON-TOXIC
- NON-STAINING
- NON-IRRITANT
- NON-CORROSIVE
- pH NEUTRAL
- FAST-ACTING
- NON-HAZARDOUS
- BROAD-SPECTRUM
- EFFICACY
